

Dual Channel Receivers 1260 - 1580 nm Single Mode SDI SFP Dual LC Connector

SDI Video Small Form Pluggable (SDI SFP)

Description

OptixCom's video SFP optical modules are deployed for the increasing demand of high definition video applications over a long distance. The design supports pathological patterns for SD, ED, HD, and 3G SDI (Serial Digital Interface) signals from 50 Mb/s to 3 Gb/s. The high data rate enables crystal clear video resolution with minimum degradation. In addition to standard optical transceiver components used in the module, a micro-controller IC is utilized to process video signals. This electrical-optical interface is also compatible with SMPTE 297-2006 standard and SFP Multi-Source Agreement (MSA) package specifications.

This particular optical module supports two channels of receiver for one-way video receiving. The module uses PIN photodiode for 1260-1580 nm incoming optical wavelength with -22 dB of sensitivity and 40 km reach typically. This product is RoHS compliant and typical power consumption is < 0.5 W.
